EncapSulite T8 Stick Light Technical Specifications

EncapSulite Stick Lights include a protective shatter – resistant polycarbonate frosted sleeve, fluorescent lamp and choice of 21 colors from our color selection chart, ranging from soft subtle to vibrant colors. Custom colors are available upon request and as a special quote. Minimum orders may apply on custom colors. Each Stick Light includes two white end caps, an 8 foot white power cord for connection to a remote lamp electronic ballast box (electronic ballast box – sold separately) and a set of wall mounting clips.

Remote Electronic Ballast Control Box:

Stick Lights require the use of a remote electronic ballast control box. Each box is constructed as: 120volt 50H/60Hz electronic instant start ballast mounted inside a metal baked white enamel box complete with a 6 foot black power cord. Available as Single Lamp or Double Lamp Control Box on T5 and T8 stick lights.
